(54) POWDERY COSMETIC

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a powdery cosmetic excellent in aesthetic of appearance, in all items such as adhesiveness to skin, fine elongation and spread, free rough surface and transparency, and in fluidity, no adhesiveness to glass and no ununiformity of splendent powder.

SOLUTION: The powdery cosmetic comprises both components, (a) plate-like powder having an average diameter of 20 to 1000 μm and (b) splendent powder having an average diameter of not less than 40 μm and different color tone from that of the component (a). The total amounts of components (a) and (b) is not less than 70% by volume based on the total of powdery cosmetic. Further, the cosmetic comprises spherical powder of 0.5 to 10% by volume as component (c).

CLAIMS

[Claim(s)]

[Claim 1] Following component (a) - (b);

(a) The charge of powder makeup containing photoluminescent fine particles with a mean particle diameter of 40 micrometers or more which has a different color tone from a plate object (b) with a mean particle diameter of 20-1000 micrometers and (a).

[Claim 2] The charge of powder makeup according to claim 1 whose total amount of a component (a) and a component (b) is more than 70 mass % in [all] the charge of powder makeup.

[Claim 3] Furthermore, the charge of powder makeup according to claim 1 or 2 which does 0.5-10 mass % content of a spherical powder object as a component (c).
